PROFESSIONAL EXPERIENCE

Atticus Advisory Solutions Inc.

06/2025 – 08/2025

IT Intern

- Supported enterprise IT operations across IT Asset Management, IT Service Management (ITSM), device deployment, and end-user support.
- Managed the full lifecycle of IT assets, including inventory tracking, configuration, deployment, maintenance, onboarding/offboarding, and asset recovery.
- Used Freshservice and Monday.com to manage assets, service requests, workflows, and cross-functional IT tasks.
- Diagnosed and resolved basic hardware and software issues, including laptop setup, reconfiguration, and troubleshooting.

PROJECTS

AyOS - Personal Productivity OS

2026

Personal Project | Tauri, Rust, React, TypeScript, SQLite, n8n

- Built and shipped a native Windows desktop application combining productivity, finance, fitness, calendar, and automation in one offline-first system.
- Designed a React-to-Rust architecture with embedded SQLite, keeping validation, persistence, backups, and native operations in the Rust backend.
- Developed an authenticated localhost API with n8n integrations and packaged the application as a production Windows installer.

LINIS: IoT System for Bin Time-to-Overflow Forecasting and Priority Collection

2026

Academic Thesis Project | ESP32, Raspberry Pi, Firebase, React Native, Python, YOLOv8, Random Forest

- Developed an IoT smart-bin monitoring system using ESP32 sensors, Raspberry Pi camera data, Firebase, and an Android application.
- Built a Random Forest model to forecast bin fill levels and a YOLOv8n people-counting pipeline using head detection within a defined Region of Interest (ROI).
- Implemented real-time synchronization between sensor and camera data and converted the vision model to NCNN for edge deployment.

QR Attendance & Allowance Management System

2024

Academic Project | Tailwind CSS, JavaScript, PHP, MySQL

- Developed a QR-based attendance system where each event has a predefined allowance amount automatically credited to eligible users after verified attendance.
- Implemented role-based dashboards for admins, workers, and attendees with event management, attendance history, announcements, and allowance tracking.
- Built and tested the system using unit, integration, user acceptance, and performance testing to validate core workflows.

EDUCATION

Bachelor of Science in Computer Engineering

2022 – 2026

Adamson University

TECHNICAL SKILLS

Languages: C++, C#, Python, JavaScript, TypeScript, PHP, Rust, SQL

Frameworks/Tools: React, React Native, Expo, .NET, Tauri, Tailwind CSS, Firebase, MySQL, SQLite, n8n

IT/Cloud: AWS, Freshservice, Monday.com, IT Asset Management, ITSM

Hardware/IoT: ESP32, Raspberry Pi, Arduino
